## EDUCATION

### Teerthanker Mahaveer University

Bachelor of Technology in Computer Science Engineering  
Cumulative SGPA: 9.5/10.0

Sep 2022 – Jun 2026  
Moradabad, India

## EXPERIENCE

### Web Developer Intern

Slash Mark IT Startup

Jun 2024 – Aug 2024

Remote

- Built and deployed multiple web projects including a **Product Landing Page**, **Portfolio Website**, and **Weather Forecast Web App** using React.js and Tailwind CSS.
- Contributed to UI and backend logic for a **URL Shortener Application**, focusing on link generation and user experience.
- Worked independently on assigned tasks, completing modules for API integration, responsive design, and component-based development.

### DBMS - Certified

NPTEL – MOOC Course

Jul 2024 – Sep 2024  
Remote (Proctored Exam)

## PROJECTS

**eCart Website** | MongoDB, Express.js, React.js, Node.js, RESTful APIs, Tailwind CSS, HTML

[Link](#)

- Developed a full-stack e-commerce website using the MERN stack, with **user authentication and Google Sign-In via Firebase**, enabling secure login, product browsing, and cart management.
- **Integrated Razorpay payment gateway** to enable secure online transactions and implemented an admin dashboard for managing products and orders.
- **Built responsive UI with Tailwind CSS**, ensuring accessibility across devices and optimized user interaction with RESTful APIs and React components.

**Food Delivery Website** | React.js, Redux Toolkit, JavaScript, Tailwind CSS, HTML

[Link](#)

- Designed and developed a **responsive food delivery website** using React.js and Tailwind CSS, offering a smooth and user-friendly interface across devices.
- **Implemented dynamic menu rendering and search functionality**, allowing users to easily browse and locate food items based on categories and keywords.
- **Built interactive cart features with real-time updates**, enabling item management, order summary, and a seamless checkout experience.

**Weather Forecast Website** | React.js, JavaScript, Tailwind CSS, HTML

[Link](#)

- Developed a **responsive weather forecast web application** using React.js and Tailwind CSS, providing real-time weather data with a clean, mobile-friendly UI.
- **Integrated OpenWeatherMap API** to fetch and display current weather conditions and 6-day forecasts based on user-input city search.
- **Built a clean UI for weather visualization**, displaying location-based temperature, humidity, and forecast using reusable React components.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), C++, Python, SQL

**Frontend:** React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Responsive Design

**Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, WebSockets, API Integration

**Databases:** MongoDB, MySQL, Database Design, Query Optimization

**Version Control & Tools:** Git, GitHub, VS Code, Chrome Dev Tools
